Some Considerations on Chronology of the Ancient History

Length of the paper – as regular

There are no solid testimonies about the civilizations of Egypt, Summer, Far East, Medial and South America, on the question of their beginnings, although, the theory of 3000 BC has been accepted up to now.

As well, the accepted chronology of E.I. Bickerman shows the obvious errors considering the Hetites and the Kingdom of Amarna. Beside the a.m. chronology, the others, from XXth century are processing the total fusing of the ancient past, by persuasion that nothing on the Earth existed before that mystical 3000 year. It is the high time to correct it.
